

ARMORDeck

ArmorDeck

ARMORDeck

Our premier product, ArmorDeck will give you the ultimate flat roadway over sand or other sub surfaces.

Each tile can be left clicked together or for even greater stability, can be locked using a simple cam design.

After all tiles are in place, the result is a perfectly flat, seamless roadway, with no sagging between decks as vehicles transit between adding tiles.

This perfect surface, is as flat a finish as a wood & ply method, yet takes a fraction of the time to lay, and is environmentally friendly!

At points of entry/exit, ArmorDeck's edging pieces, allow a smooth, simple and safe transition from the sub-surface to the main deck, suitable for pedestrians, vehicles and wheelchair access.

ArmorDeck's fastening system

Lock together adjoining decks easily

No sagging between decks as weights are transferred

Loads up to 25,000 lbs per sq ft

For a perfectly flat finish, ready for carpeting, or simply leave plain!
